

Whitepaper

1. Introduction

Faster Token (FSTR) is a reliable, transparent, and manipulation-resistant decentralized digital currency built on the Binance Smart Chain (BSC). It aims to provide a fast, low-cost, and fair trading experience for everyday users and professional traders alike.

2. Problem

The cryptocurrency market is filled with tokens subject to manipulation, unfair allocation, and rug-pulls. This undermines trust and limits adoption by responsible users.

3. Solution

FSTR was created as a real currency token, not a meme or hype-driven project. With a fixed supply and anti-manipulation design, FSTR is tailored for stable peer-to-peer value transfer and trading. Most importantly, FSTR is a stepping stone toward launching our own blockchain network (mainnet), where holders will benefit directly from the transition.

4. Technology

FSTR is deployed as a BEP-20 token on Binance Smart Chain. Its smart contract is locked, transparent, and auditable, offering high-speed transactions and low fees. Upon launch of the Faster mainnet, BEP-20 FSTR tokens will be swappable into native mainnet tokens at a fixed rate, ensuring continuity and trust.

5. Team

The project is led by experienced developers and professional traders committed to fair practices and long-term vision. There are no anonymous founders.

6. Token Allocation

- Mainnet Development and Reserve: 35%
- Liquidity Pool: 30%
- Team and Advisors: 15%
- Marketing and Partnerships: 10%
- Community Rewards and Giveaways: 5%

This reserve will fund the Faster Blockchain development and serve as a swap pool for transitioning BEP-20 tokens to native mainnet tokens.

7. Roadmap

- Token deployment & smart contract audit
- Initial exchange listings
- Community building and early partnerships
- Whitepaper & website launch
- Begin Faster Blockchain development
- Mainnet testnet and validator onboarding
- BEP-20 to Mainnet swap mechanism
- Final mainnet launch & ecosystem integration

8. Community

The Faster community is at the core of everything. We grow together, with transparency and inclusion.

9. Risk Disclaimer

FSTR is a cryptocurrency and subject to market risks, regulatory changes, and technical uncertainties. Always DYOR (Do Your Own Research).
